

TRAFFIC ALERT

27-HOUR CLOSURE ON SUNDAY MARCH 12

TRAFFIC PATTERN SWITCH AFTER 27-HOUR CLOSURE

During the 27-hour closure, crews will demolish the I-10 Eastbound Overpass (shaded in red) and they will re-stripe the eastbound lanes, placing traffic on the newly constructed median (shown with the arrows).

By 6 am on March 13, the intersection will be restored and open to traffic, except I-10 Eastbound traffic will be switched over onto the median of the I-10 Overpass. The switch to the median will stay in place for at least four months while crews re-build the new and improved I-10 Eastbound Overpass.

This work normally takes days to complete, but crews will be working hard to complete it in 27 hours and on a Sunday in an effort to minimize impacts to motorists and businesses.

Motorists should avoid the intersection on March 12 by using [alternate routes](#) such as Transmountain (Loop 375). Motorists who cannot avoid the intersection should follow the detour signs in place.

Note: All closures are subject to change. Updates are being posted to go10elpaso.com.
